

Championship Image Access

How do I find the photos just from my championship or event?

Photo Shelter has a keyword search page available here:

<https://photostore.d3photography.com/search-page>

We add, when available, the athlete name and school for Track, Cross Country, Swimming and Wrestling championships, but also apply keywords to **all** events we cover so it is imperative you fill in as much detail as possible.

Our Recommendation

- Use your school name as published either by D3sports.com's websites or as listed on your invoice from d3photo for the championship.
- Include the date range from the event
- (if d3photo was at another event of yours at the same time) include either the state and/or the city of the championship. This is typically not necessary.

Then click Search.

You can take all these and download individually as you wish. They will remain online for the lifetime of our presence on Photo Shelter and will be relocated if we move to another platform.

If you are a school and have purchased the rights to these images you can create a gallery of just your photos from select events.

Visit https://championships.d3photography.com/image_search/ for more information. You must be the listed athletics communications contact(s) in order to get access to these images as the system will be bound to their email address(es).

We are constantly working and expanding our selection of tools for schools. Please report any bugs or suggestions onto our Redmine (account required) at <https://redmine.d3photography.com/>
